^{**} Preliminary calculation

Successfully acquired Sberbank d.d. despite challenging quarter HPB

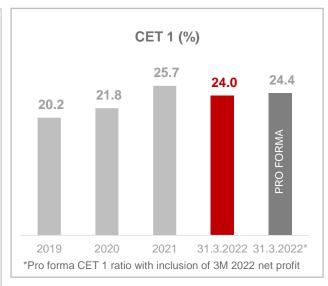

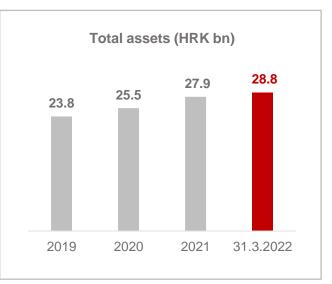

Increase in market share in 2022

- Rapid takeover of the NHB based on a robust capital position that has been intentionally created in the last three years, as well as proverbially massive liquidity;
- Largest banking business network through own branch offices and post offices; with the acquisition of NHB we are strengthening our presence on the Croatian market (30 new business centers for retail and 12 for corporate clients);
- Further focus on the **EURO project** as an absolute priority, and the integration of Nova hrvatska banka.

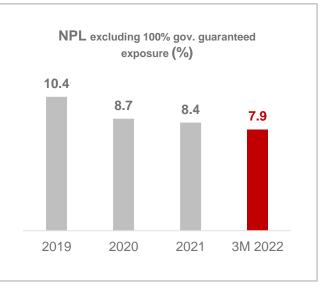

Realized profit in a challenging guarter

- Decrease in net profit is largely the result of a loss from trading due to government bond falling prices. On the other hand, record prices in real estate segment contributed to the net result of provisions, due to the realization of collateral at higher prices, being significantly above the plan;
- Asset increase HRK +893 mn in 2022:
- Improved portfolio quality with NPL ratio excluding 100% government guaranteed exposures on historically lowest level.

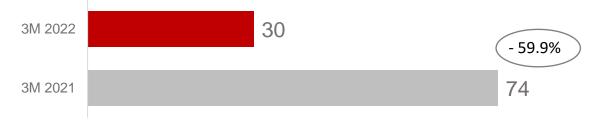

- Income statement items are shown in cumulative from start of the period until the reporting date; cumulative 1.1 - 31.3;
- Balance sheet items are shown as at reporting date; 31.12. and 31.3.

Result after tax*

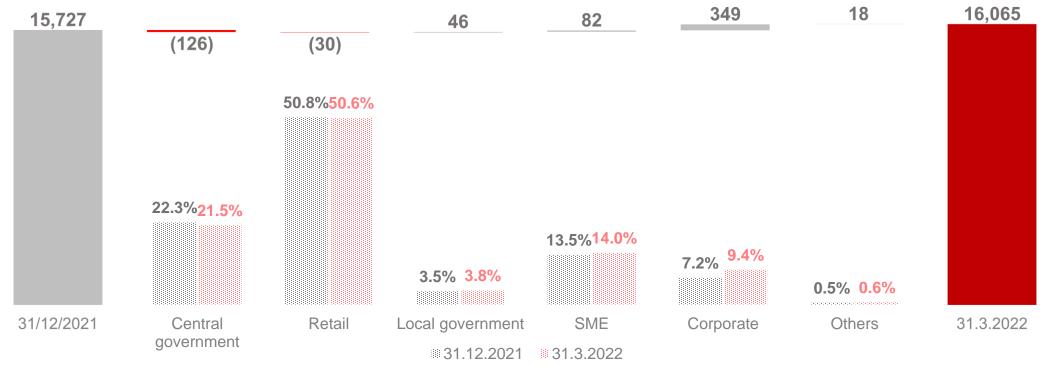

Financial markets segment was negative in operating and after tax results due to strong yield growth and falling government bond prices.

Gross loans development by segment

Gross loans (in HRK mn)

- Retail sector recorded a decline in the gross loan portfolio in the first quarter of 2022 according to lower loan volume due to the processing a large number of APN requests and a significant focus on this type of lending in the first quarter. Time invested in these operations should be seen in the result and the gross loan portfolio (GLP) in the coming months when GLP growth is expected. In addition, the decline in the first quarter was due to the implementation of the Decision of the Civil Protection Headquarters for the mandatory use of COVID certificates when entering branches, which affected the number of received loan applications and disrupted the dynamics of receiving applications at cca 40% clients;
- Corporate segment showed strong recovery in 2021 after the COVID pandemic, and significant credit growth in the first quarter was the result of intensive acquisition activities started in Q4 2021. Although lack of significant investments affected lending activities, the focus was on liquidity requirements and refinancing existing liabilities;
- SME growth is the result of portfolio diversification to a larger number of clients, client acquisitions made through quality refinancing exposures in other banks, monitoring of clients' investments (production plants, warehouses, hotels, ships, halls) which indicate stability and positive trends in their business, monitoring clients in working capital in accordance with their growth and potential. All of the above, although the pressure to reduce interest rates is daily, indicates the sustainable operation of SMEs in the context of income (interest and non-interest).
