Statement of the President of the Management Board

On the occasion of releasing financial results for first nine months of 2026, **Marko Badurina, President of the Management Board of Hrvatska poštanska banka**, stated:

„I am very proud of yet another successful quarter, in which the Bank completed the acquisition of Croatia banka, issued its first international bond, closed the credit facility with Hrvatske autoceste, the largest transaction in its history, and carried out a number of other operational activities. Successful change management and the HPB team continue to deliver positive results, which are also reflected in the figures for the third quarter. Following the seasonal slowdown typical of the first half of the year, the Bank's balance sheet reached EUR 8.6 billion in the third quarter of 2026, a new record. Owing to the aforementioned credit facility with HAC, the balance sheet structure changed significantly, as reflected in the jump in the loan-to-deposit ratio to almost 70%, the highest in a decade.

The effects of all the changes and continuous optimisations are best illustrated by the fact that core income, namely net interest income and net fee and commission income, reached a record level in the third quarter. In the period ahead, we will continue to strengthen HPB and create value for all our stakeholders.”

- ☑ Net interest income increased by 8.4%, driven by higher lending activity (HAC and other business segments) and the balance sheet transformation (2025).
- ☑ Net fee and commission income increased by 4.1% in the observed period primarily due to higher customer activity.
- ☑ Operating expenses increased by EUR 6.3 mn in the observed period as a result of strategic investments in digitalisation, alongside an increase in employees expenses aimed at maintaining market competitiveness.
- ☑ The increase in provisions expenses reflects the growth in the performing loan portfolio.

**To ensure data comparability, the comparative period 9M 2025 has been aligned with the change in data source applied on 9M 2026.*

Source: Regulatory report

NPL share* – HPB vs market

Source: HPB: FINREP regulatory report, market: CNB statistics, SV2 Selected indicators of the structure, concentration and operations of credit institutions

* NPL ratio is calculated in accordance with the CNB methodology (denominator includes funds with central banks and other demand deposits)

** Based on the preliminary amounts of non-performing loans

- Provision expenses related to the performing portfolio (Stage 1 and Stage 2) amounted to EUR 1.1 mn in the first nine months of 2026., while EUR 2.8 mn was recognised in the third quarter, primarily reflecting increased lending exposure to corporate clients.
- In the non-performing loan (NPL) segment, income from reversal of provisions of EUR 2.2 million was recognized, primarily driven by stronger collections and recoveries from the NPL portfolio, which largely offset the cost of new provisions in the corporate portfolio. This contributed to a further improvement in the NPL ratio, accompanied by a reduction in the NPL balance compared with year-end. NPL coverage stood at 76.1% as of September 30, 2026, above the market average of 65.4% as of June 30, 2026, reflecting a prudent level of provisioning for the NPL portfolio.

Stable capital position supported by growth in MREL-eligible instruments following the international bond issuance

Capital indicators *

* Capital indicators as of September 30, 2026 are based on preliminary data.

☑ The movement in the common equity tier 1 (CET1) ratio reflects the increase in RWAs driven by strong lending activity during the period under review. Common equity tier 1 capital was primarily influenced by net profit generated and the approved dividend distribution.
